Notes to Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian dollars)

Three months ended March 31, 2009 and 2008

#### 1. Basis of presentation:

These unaudited interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial statements and accordingly, do not include all disclosures required for annual financial statements.

The unaudited interim consolidated financial statements reflect, in the opinion of management, all adjustments and reclassifications necessary to present fairly the financial position, results of operations and cash flows at March 31, 2009 and for all periods presented.

The results of operations for the three month periods ended March 31, 2009 and March 31, 2008 are not necessarily indicative of the results for the full year.

These statements should be read in conjunction with the Company's audited consolidated financial statements and notes thereto for the year ended December 31, 2008 and included in the 2008 Annual Report.

These financial statements reflect the same significant accounting policies as those described in the notes to the audited consolidated financial statements of Tekmira Pharmaceuticals Corporation ("the Company") for the year ended December 31, 2008, except as described in note 2.

The success of the Company and its ability to realize the value of its non-monetary assets is dependent on obtaining the necessary regulatory approval, bringing its products to market and achieving profitable operations. The continuation of the research and development activities and the commercialization of its products are dependent on the Company's ability to successfully complete these activities and to obtain adequate financing through a combination of financing activities and operations. It is not possible to predict either the outcome of future research and development programs or the Company's ability to fund these programs going forward.

These consolidated financial statements include the accounts of the Company and its two wholly-owned subsidiaries, Protiva Biotherapeutics Inc. and Protiva Biotherapeutics (USA), Inc., which were acquired on May 30, 2008. All intercompany transactions and balances have been eliminated on consolidation.

#### 2. Adoption of new accounting standards:

Effective January 1, 2009, the Company adopted the Canadian Institute of Chartered Accountants ("CICA") accounting standards updates for goodwill and intangible assets (CICA 3064) and for financial statement concepts (CICA 1000). CICA 3064, Goodwill and Intangible Assets replaced CICA 3062, Goodwill and Other Intangible Assets, and CICA 3450, Research and Development Costs. CICA 1000, Financial Statement Concepts was also amended to provide consistency with this new standard. The new section establishes standards for the recognition, measurement, and disclosure of goodwill and intangible assets. The adoption of this new section did not impact the Company's consolidated financial statements.

Notes to Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian dollars)

Three months ended March 31, 2009 and 2008

#### 3. Collaborative Agreements:

#### (a) License and collaboration with Alnylam Pharmaceuticals, Inc. ("Alnylam")

Further information on the licensing and collaborative agreements with Alnylam is provided in the Company's audited consolidated financial statements and notes thereto for the year ended December 31, 2008.

#### License and Collaboration Agreement with Alnylam through Tekmira

On January 8, 2007, the Company entered into a licensing and collaboration agreement ("License and Collaboration Agreement" or "LCA") with Alnylam giving them an exclusive license to the Company's lipid nanoparticle intellectual property for the discovery, development, and commercialization of ribonucleic acid interference ("RNAi") therapeutics.

#### Cross-License with Alnylam acquired through Protiva

As a result of the acquisition of Protiva on May 30, 2008, the Company acquired a Cross-License Agreement ("Cross-License") between Protiva and Alnylam dated August 14, 2007. Alnylam was granted a non-exclusive license to the Protiva intellectual property. Under the Cross-License, Alnylam is required to make collaborative research payments at a minimum rate of US\$2,000,000 per annum for the provision of the Company's research staff until August 13, 2009.

Notes to Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian dollars)

Three months ended March 31, 2009 and 2008

#### 3. Collaborative Agreements (continued)

#### (a) License and collaboration with Alnylam Pharmaceuticals, Inc. ("Alnylam") (continued)

#### Research and development collaboration with Alnylam

Up until December 31, 2008, Alnylam was making collaborative agreement payments to both Tekmira and Protiva. Effective January 1, 2009, all collaborative research with Alnylam is to be performed under the Cross-License and manufacturing is performed under a new agreement (the "Manufacturing Agreement") dated January 2, 2009. Under the Manufacturing Agreement the Company continues to be the exclusive manufacturer of any products required by Alnylam through to the end of phase 2 clinical trials that utilize the Company's technology. Alnylam pays the Company for the provision of staff and for external costs incurred. Time charged to Alnylam will be at a fixed rate and under the new Manufacturing Agreement there is a contractual minimum for the provision of staff of \$11,200,000 for the three years from 2009 to 2011.

## Licensing fees and milestone payments - Up-front payment under the 2007 Alnylam-Tekmira LCA

Under the Alnylam-Tekmira LCA, the Company received 361,990 newly issued shares of Alnylam common stock which the Company sold for the net amount of \$8,938,867 (US\$7,594,619) and a subsequent cash payment of \$475,720 (US\$405,381) to bring the total up-front payment to \$9,414,587 (US\$8,000,000). Under a license agreement with the University of British Columbia ("UBC"), the Company has made a milestone payment of \$941,459, in respect of the up-front payment from Alnylam. In accordance with the Company's revenue recognition policy, the up-front payment of \$9,414,587 and the milestone payment to UBC of \$941,459, were deferred and were amortized on a straight-line basis to revenue and expense respectively to December 31, 2008, the period over which the Company provided research support under the LCA.

Alnylam has provided non-exclusive access to the Company's lipid nanoparticle intellectual property to F. Hoffman-La Roche Ltd ("Roche"), Regulus Therapeutics, Inc. (a joint venture between Alnylam and Isis Pharmaceuticals, Inc.) and Takeda Pharmaceutical Company Limited ("Takeda"). The Company is eligible to receive up to US\$16,000,000 in milestones for each RNAi therapeutic advanced by Alnylam or its partners. The Company is also eligible for royalties on product sales. These milestones and royalties will pass through Alnylam. Of the US\$16,000,000 potential milestone payments, US\$4,500,000 relate to pre-regulatory approval milestones and US\$11,500,000 relate to the milestones of regulatory approval and cumulative product sales of over US\$500,000,000.

#### Alnylam deferred revenue

At March 31, 2009, the Company had deferred research and development collaboration revenue in respect of Alnylam of \$539,587 (December 31, 2008 - \$309,250).

Notes to Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian dollars)

Three months ended March 31, 2009 and 2008

#### 3. Collaborative Agreements (continued)

#### (b) Other RNAi collaborators

The Company has active research agreements with a number of other RNAi collaborators including Bristol-Myers Squibb Company, Roche (see Note 7 – Subsequent events) and Takeda. As at March 31, 2009 there is a deferred revenue balance of \$410,761 in respect of other RNAi collaborators (December 31, 2008 - \$149,844).

#### 4. Common share capital:

#### Stock options

The following table sets forth outstanding options under the Company's 1996 Stock Option Plan:

	Number of optioned common shares	•	average cise price
Balance, December 31, 2008	4,588,426	\$	2.25
Options granted Options exercised Options forfeited	3,500 (2,000) (35,125)		0.61 0.30 2.98
Balance, March 31, 2009	4,554,801	\$	2.24

The stock options expire at various dates from May 16, 2009 to March 15, 2019. A total of 568,204 options are available for future allocation under the 1996 Share Option Plan.

On May 30, 2008, as a condition of the acquisition of Protiva, the Company reserved 1,752,294 common shares for the exercise of 519,073 Protiva share options ("Protiva Options"). The Protiva Options have an exercise price of \$0.30, are fully vested, expire at various dates from November 19, 2010 to March 1, 2018 and upon exercise each option will be converted into approximately 3.3758 shares of the Company. To March 31, 2009, none of the Protiva Options had been exercised or cancelled. The Protiva Options are not part of the Company's 1996 Stock Option Plan and the Company is not permitted to grant any further Protiva Options.

Notes to Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian dollars)

Three months ended March 31, 2009 and 2008

#### 5. Stock-based compensation:

The Company has recorded an expense of \$110,845 for employee stock-based compensation in the three months ended March 31, 2009 (three months ended March 31, 2008 - \$30,078), calculated in accordance with the fair value method.

The fair value of each option is estimated as at the date of grant using the Black-Scholes option pricing model. As no options were granted in the three months ended March 31, 2008, no option pricing model assumptions were required. The weighted average assumptions used to value options granted in the three months ended March 31, 2009 were as follows:

	Three months ended March 31, 2009
Dividend yield	0.0%
Expected volatility	142.7%
Risk-free interest rate	1.95%
Expected average option term	5.0 years
Fair value of options granted	\$0.55

#### 6. Related party transactions

Research, development and collaborations expenses in the three month period ended March 31, 2009 include \$29,638 of contract research costs, measured at the exchange amount and incurred in the normal course of operations with a vendor whose Chief Executive Officer is also a director of the Company (three months ended March 31, 2008 - \$nil). Accounts payable and accrued liabilities at March 31, 2009 include \$15,402 in respect of this vendor (March 31, 2008 - \$nil).

#### 7. Subsequent event

On May 11, 2009 the Company announced a product development agreement with Roche ("Product Development Agreement"). Under the Product Development Agreement and a research agreement dated February 11, 2009, Roche will pay the Company up to US\$18,400,000 to support the advancement of Roche's first two RNAi product candidates using the Company's SNALP technology through to the filing of Investigational New Drug applications. The Company is also eligible to receive up to US\$32,000,000 in milestones plus royalties on product sales as the first two products are advanced through development and commercialization based on Roche's access to the Company's intellectual property.

The Company will develop and manufacture the drug products for use in all preclinical studies related to the two products and will collaborate with Roche to conduct the preclinical testing. The agreement also provides that the Company will manufacture one batch of clinical product for a Phase 1 clinical trial.

#### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND OPERATIONS

May 13, 2009 / This discussion and analysis should be read in conjunction with the unaudited interim consolidated financial statements and related notes for the period ended March 31, 2009, and the audited consolidated financial statements and related notes for the year ended December 31, 2008, both of which are prepared in accordance with Canadian generally accepted accounting principles, and management's discussion and analysis of financial condition and operations for the year ended December 31, 2008. Unless the context otherwise requires, all references to "Tekmira", the "Company", "we", "us", and "our" refer to Tekmira Pharmaceuticals Corporation, including all its subsidiaries. Additional information relating to Tekmira, including the Company's March 31, 2009 Annual Information Form is on the System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com.

#### FORWARD-LOOKING STATEMENTS

This discussion and analysis, contains forward-looking statements that are not based on historical fact, including without limitation statements containing the words "believes", "may", "plan", "will", "estimate", "continue", "anticipates", "intends", "expects", and similar expressions, including the negative of such expressions. These statements are only predictions.

Forward-looking statements and information should be considered carefully. Undue reliance should not be placed on forward-looking statements and information as there can be no assurance that the plans, intentions or expectations upon which they are based will occur. By their nature, forward-looking statements and information involve numerous assumptions, known and unknown risks and uncertainties, both general and specific, which contribute to the possibility that the predictions, forecasts, projections and other forward-looking statements and information will not occur and may cause actual results or events to differ materially from those anticipated in such forward-looking statements and information.

More particularly and without limitation, this discussion and analysis contains forward-looking statements, assumptions and information concerning the Company's potential, the potential of RNAi therapeutics as a treatment for disease, our product development plans, the number and timing of advancement of our products into clinical development, the plans of our collaborative partners and the impact of those collaborations on our product development activities and our financial resources. There are circumstances and factors that may cause our assessments included in these forward-looking statements to materially change. Such circumstances and factors include the failure of RNAi therapies to become commercially viable, our inability or a collaborative partner's inability to develop commercially viable RNAi therapies and changes to the product development plans of our collaboration partners.

Also included in this discussion and analysis is an estimate of the length of time that our business will be funded by our anticipated financial resources (see Risks and uncertainties). There are circumstances and factors that may cause actual cash usage to be materially different from our current estimate of the adequacy of our cash resources. Such circumstances and factors include the following: preclinical trials may not be completed, or clinical trials started, when anticipated; preclinical and clinical trials may be more costly or take longer to complete than currently anticipated; preclinical or clinical trials may not generate results that warrant future development of the tested drug candidate; funding and milestone payments from our research and product development partners may not be provided when required under our agreements with those partners; decisions to in-license or acquire additional products for development; we may become subject to product liability or other legal claims for which we have made no accrual on our financial statements; the sufficiency of budgeted capital expenditures in carrying out planned activities; and the availability and cost of labour and services.

Our business is also subject to other risks and factors that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements and information. Such factors include, among others, the stage of development of Tekmira, lack of product revenues, additional capital requirements, the impact of the global economic downturn, the need to obtain regulatory approval to commence further clinical trials, risks associated with the completion of clinical trials and obtaining regulatory approval to market our products, the safety and efficacy of our products, our ability to protect our intellectual property and dependence on collaborative partners.

A more complete discussion of the risks and uncertainties facing Tekmira appears in our Annual Information Form dated March 31, 2009 available at www.sedar.com. We disclaim any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements or information contained herein to reflect future results, events or developments, except as required by law.

#### **OVERVIEW**

Tekmira is a biopharmaceutical company focused on advancing novel RNA interference therapeutics and providing its leading lipid nanoparticle delivery technology to pharmaceutical partners.

#### Business combination with Protiva on May 30, 2008

On May 30, 2008, we completed the acquisition of 100% of the outstanding shares of Protiva Biotherapeutics, Inc. ("Protiva"), a privately owned Canadian company developing lipid nanoparticle delivery technology for small interfering RNA (siRNA) and combined our businesses. We believe the business combination gives us leading scientific capabilities and intellectual property to deliver RNAi therapeutics using our lipid nanoparticle delivery technology which we refer to as SNALP (Stable Nucleic Acid Lipid-Particles).

The Protiva acquisition was accounted for using the purchase method of accounting. Accordingly, the assets, liabilities, revenues and expenses of Protiva are consolidated with those of the Company from May 30, 2008.

Further information on the acquisition of Protiva is provided in the Company's 2008 Annual Report.

#### Technology, product development and licensing agreements

Our therapeutic product pipeline consists of products being developed internally with our research and development resources. We also support the development of our partners' products. Our focus is on advancing products that utilize our proprietary lipid nanoparticle technology, referred to as SNALP, for the delivery of siRNA. These products are intended to treat diseases through a process known as RNA interference which prevents the production of proteins that are associated with various diseases. We have rights under Alnylam Pharmaceuticals, Inc.'s ("Alnylam") fundamental RNAi intellectual property to develop up to seven RNAi therapeutic products.

Our lead internal product candidates are

- apolipoprotein B ("ApoB") SNALP, for the treatment of high cholesterol; and
- polo-like kinase 1 ("PLK1") SNALP for the treatment of cancer.

In the field of RNAi therapeutics, we have licensed our lipid nanoparticle delivery technology to Alnylam and Merck & Co., Inc. Alnylam has granted non-exclusive access to some of our intellectual property to certain of its partners, including F. Hoffmann-La Roche Ltd and Hoffmann-La Roche Inc. (together "Roche"), Regulus Therapeutics, Inc. ("Regulus") (a joint venture between Alnylam and Isis

Pharmaceuticals, Inc.) and Takeda Pharmaceutical Company Limited. In addition, we have research relationships with Bristol-Myers Squibb Company, the US Army Medical Research Institute for Infectious Diseases and the United States National Cancer Institute. Outside the RNAi field, we have legacy licensing agreements with Hana Biosciences, Inc. and Aradigm Corporation.

#### **ApoB SNALP**

ApoB SNALP is an agent designed to reduce the production of ApoB in the liver. ApoB is a protein synthesized in the liver that plays a central role in transporting cholesterol in the body and is a potential target for achieving a reduction of low density lipoprotein ("LDL") cholesterol also known as "bad cholesterol". Elevated LDL cholesterol levels are associated with increased risk of atherosclerosis causing narrowing of the blood vessels.

The therapeutic potential of ApoB SNALP has been demonstrated in preclinical models of hypercholesterolemia or high cholesterol. Rodents fed a high fat (so-called "Western") diet demonstrate a 50-100% increase in total cholesterol in the blood. A single ApoB SNALP treatment can overcome such diet-induced hypercholesterolemia, returning blood cholesterol levels to normal. The suppressive effects of a single SNALP dose lasts for weeks in mice and is expected to last longer in larger animals. In addition to rodent animal studies, we have conducted several studies showing that ApoB SNALP can be effective at lowering LDL cholesterol levels in non-human primates with durable effects.

We have completed formal safety studies for ApoB SNALP and on May 7, 2009 we announced that the FDA has approved our Investigational New Drug (IND) application to initiate a Phase 1 human clinical trial. This clinical trial will be conducted in high cholesterol patients and will initially determine the safety profile of ApoB SNALP and may provide some preliminary data on LDL cholesterol lowering activity. We expect to initiate the trial before the end of June 2009. We anticipate that subsequent clinical studies will evaluate the efficacy of ApoB SNALP as a single agent or in combination with other cholesterol-lowering drugs.

#### **PLK1 SNALP**

Our second internal siRNA product, PLK1 SNALP, has been shown in preclinical animal studies to selectively kill cancer cells, while sparing normal cells in healthy tissue. We expect to initiate formal safety studies for PLK1 SNALP in the second half of 2009 and to submit an IND application to initiate a human clinical trial in 2010.

#### Alnylam collaboration and license

On January 8, 2007, we entered into a licensing and collaboration agreement with Alnylam giving them an exclusive license to the lipid nanoparticle intellectual property owned by Tekmira, prior to the business combination with Protiva, for the discovery, development, and commercialization of RNAi therapeutics.

As a result of the business combination with Protiva on May 30, 2008 we acquired a Cross-License Agreement ("Cross-License") between Protiva and Alnylam, dated August 14, 2007. The Cross-License grants Alnylam non-exclusive access to Protiva's intellectual property and requires Alnylam to fund a certain level of collaborative research.

On August 21, 2007, under the Cross-License, Alnylam made a payment of US\$3.0 million that gives Alnylam the right to "opt-in" to our PLK1 SNALP project and contribute 50% of product development costs and share equally in any future product revenues. Alnylam has until the start of a Phase 2 clinical trial of the PLK1 SNALP project to exercise their opt-in right. If Alnylam chooses to opt into the PLK1 SNALP project the US\$3.0 million already paid will be credited towards Alnylam's 50% share of project costs to date.

We are eligible to receive from Alnylam up to US\$16.0 million in milestones for each RNAi therapeutic advanced by Alnylam or its partners that utilizes our intellectual property, and royalties on product sales. The impact of the Alnylam agreements, including contract manufacturing services, on our results of operations, is covered further in the Revenue section of this discussion.

As well as the research and development funding, exclusive contract manufacturing rights, up-front payments and potential milestones, the agreements with Alnylam grant to us intellectual property rights to develop our own proprietary RNAi therapeutics. Alnylam has granted us a worldwide license to their intellectual property portfolio for the discovery, development and commercialization of RNAi products directed to seven gene targets (three exclusive and four non-exclusive licenses). Licenses for two targets, ApoB and PLK1, have already been granted on a non-exclusive basis.

Under the RNAi licenses granted to us, we may select five additional gene targets to develop RNAi therapeutic products, provided that the targets are not part of an ongoing or planned development program of Alnylam. In consideration for this license, we have agreed to pay royalties to Alnylam on product sales and have milestone obligations of up to US\$8.5 million on each of the four non-exclusive targets (with the exception of PLK 1 SNALP if Alnylam opts—in to the development program).

On April 3, 2009 Alnylam announced that they had initiated a Phase 1 human clinical trial for a product candidate that utilizes our SNALP technology. The Alnylam product candidate, ALN-VSP, is being developed as a treatment for liver cancer and other solid tumors with liver involvement. ALN-VSP comprises siRNA molecules delivered systemically using our SNALP technology. We are responsible for manufacturing ALN-VSP drug product. The initiation of the ALN-VSP Phase 1 clinical trial triggered a milestone payment which we expect to receive in May 2009.

Under a new Manufacturing Agreement dated January 2, 2009, we will continue to be the exclusive manufacturer of any products required by Alnylam through to the end of Phase 2 clinical trials that utilize our technology. Alnylam will pay for the provision of staff and for external costs incurred. Under the new Manufacturing Agreement there is a contractual minimum of \$11.2 million for the three years from 2009 to 2011 for the provision of staff.

#### Roche product development and research agreements

On May 30, 2008, we signed an initial research agreement with Roche. This initial research agreement expired at the end of 2008 and has been replaced by a research agreement (the "Roche Research Agreement") dated February 11, 2009. Recognition of revenue from this agreement is covered in the Revenue section of this discussion.

On May 11, 2009 we announced a product development agreement with Roche (the "Roche Product Development Agreement") that expands on the Roche Research Agreement. Under the agreement Roche expects to advance their first two RNAi product candidates into human clinical testing. Each of the product candidates will be comprised of Roche proprietary siRNAs encapsulated in our proprietary SNALP technology.

Under the Roche agreements they will pay us up to US\$18.4 million to support the advancement of the product candidates through to the filing of IND applications. We are also eligible to receive up to US\$32 million in milestones plus royalties on product sales as the first two products are advanced through development and commercialization based on Roche's access to Tekmira's intellectual property through Alnylam. Roche and Tekmira expect an IND for the first product candidate to be filed before the end of 2010.

We will manufacture the drug product for use in all preclinical studies related to the two products and we will collaborate with Roche to conduct the preclinical testing. The agreement also provides that Tekmira will manufacture one batch of clinical product for a Phase 1 clinical trial.

#### Merck & Co., Inc. ("Merck") license agreement

As a result of the business combination with Protiva we have acquired a non-exclusive royalty-bearing world-wide license agreement with Merck. Under the license, Merck will pay up to US\$17.0 million in milestones for each product they develop covered by Protiva's intellectual property, except for the first product for which Merck will pay up to US\$15.0 million in milestones, and will pay royalties on product sales. Merck has also granted a license to the Company to certain of its patents. The license agreement with Merck was entered into as part of a settlement of litigation between Protiva and a Merck subsidiary.

As provided under the agreement with Merck, we anticipate an arbitration proceeding will determine the inventorship of certain intellectual property. We do not expect the outcome of the arbitration to have a material effect on our operations or the value of our intellectual property.

#### Bristol-Myers Squibb Company ("Bristol-Myers Squibb") research agreement

As a result of the business combination with Protiva we have acquired a research collaboration agreement with Bristol-Myers Squibb to evaluate the use of SNALP technology for target validation. Bristol-Myers Squibb recently extended this collaboration through to the end of 2009. The impact of this agreement on our results of operations is covered in the Revenue section of this discussion.

#### US Army Medical Research Institute for Infectious Diseases (USAMRIID) research agreement

In 2005, Protiva and the USAMRIID signed a five year research agreement to collaborate on the development of SNALP siRNA-based therapy against filovirus infections. The USAMRIID waives any rights to inventions made in whole or in part by our employees and we have the option to retain title to such inventions with the U.S. Government retaining a non-exclusive paid-up license. The USAMRIID retains title to any inventions made by its employees, provided that we are granted an exclusive license on mutually agreed terms, with the U.S. Government retaining a non-exclusive paid-up license. Grants received from the USAMRIID are netted against research and development expenses when the grant is earned.

#### Takeda Pharmaceutical Company Limited ("Takeda") research agreement

On December 26, 2008, we signed an initial research agreement with Takeda. Recognition of revenue from this agreement is covered in the Revenue section of this discussion.

Takeda has a non-exclusive sublicense to our intellectual property and we are eligible to receive up to US\$16.0 million in milestones plus additional royalties on each Takeda product that uses our technology.

#### Hana Biosciences, Inc. ("Hana") license agreement

Hana is developing our targeted chemotherapy products under a license agreement entered into in May 2006. Marqibo® (Optisomal Vincristine), Alocrest<sup>TM</sup> (formerly INX-0125, Optisomal Vinorelbine) and Brakiva<sup>TM</sup> (formerly INX-0076, Optisomal Topotecan), have been exclusively licensed to Hana. Hana has agreed to pay us milestones and royalties and is responsible for all future development and future expenses.

#### Aradigm Corporation ("Aradigm") license agreement

On December 8, 2004, we entered into a licensing agreement with Aradigm under which Aradigm exclusively licensed certain of our liposomal intellectual property. Under this agreement, we are entitled to milestone payments totaling US\$4.75 million for each disease indication, to a maximum of two,

pursued by Aradigm using our technology. In addition, we are entitled to royalties on any product revenue.

#### **CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

Our critical accounting policies and estimates are disclosed in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section and the notes to our audited annual consolidated financial statements contained in our 2008 Annual Report.

#### CHANGES IN ACCOUNTING POLICIES AND ADOPTION OF NEW STANDARDS

#### Goodwill and intangible assets (CICA 3064) and financial statement concepts (CICA 1000)

Effective January 1, 2009, CICA 3064, *Goodwill and Intangible Assets* replaced CICA 3062, *Goodwill and Other Intangible Assets*, and CICA 3450, *Research and Development Costs*. CICA 1000, *Financial Statement Concepts* was also amended to provide consistency with this new standard. The new section establishes standards for the recognition, measurement and disclosure of goodwill and intangible assets. The adoption of this new section did not impact the Company's consolidated financial statements.

#### RECENT ACCOUNTING PRONOUNCEMENTS

## Convergence with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB)

In February 2008, the Accounting Standards Board (AcSB) confirmed that Canadian GAAP for publicly accountable enterprises will be converged with IFRS effective in calendar year 2011, with early adoption allowed starting in calendar year 2009. IFRS use a conceptual framework similar to Canadian GAAP, but there are significant differences on recognition, measurement and disclosures. In the period leading up to the changeover, the AcSB will continue to issue accounting standards that are converged with IFRS, thus mitigating the impact of adopting IFRS at the changeover date. The IASB will also continue to issue new accounting standards during the conversion period and, as a result, the final impact of IFRS on our consolidated financial statements will only be measured once all the IFRS applicable at the conversion date are known.

We will be required to changeover to IFRS for interim and annual financial statements beginning on January 1, 2011. As a result, we are developing a plan to convert our consolidated financial statements to IFRS. Individuals primarily responsible for the changeover have been identified and have begun training.

A detailed analysis of the differences between IFRS and the Company's accounting policies as well as an assessment of the impact of various alternatives will be conducted during 2009. Changes in accounting policies are likely and may materially impact our consolidated financial statements.

#### **SUMMARY OF QUARTERLY RESULTS**

The following table presents our unaudited quarterly results of operations for each of our last eight quarters. This data has been derived from our unaudited consolidated financial statements, which were prepared on the same basis as our annual audited financial statements and, in our opinion, include all adjustments necessary, consisting solely of normal recurring adjustments, for the fair presentation of such information.

The quarterly results shown below include the results of Protiva from date of acquisition, May 30, 2008.

(in millions Cdn\$ except per share data)

	June 30 2007	Sept 30 2007	Dec 31 2007	March 31 2008	June 30 2008	Sept 30 2008	Dec 31 2008	March 31 2009
Revenue	\$ 3.0	\$ 5.7	\$ 4.2	\$ 1.9	\$ 2.5	\$ 4.2	\$ 3.1	\$ 2.9
Net income (loss)	(5.1)	1.5	0.4	(0.4)	(4.8)	(6.0)	(3.0)	(2.1)
Basic and diluted net income (loss) per sha	are \$ (0.21)	\$ 0.06	\$ 0.01	\$ (0.02)	\$ (0.14)	\$ (0.12)	\$ (0.06)	\$ (0.04)

**Quarterly Trends** / Our revenue is derived from research and development collaborations, licensing fees and milestone payments. Over the past two years, our principal sources of revenue have been our Alnylam and Hana partnerships entered into in March 2006 and May 2006, respectively. Revenue in 2007 includes approximately \$1.0 million each quarter relating to the amortization of a Hana up-front payment. Revenue in the third quarter of 2007 increased as we completed the manufacture of a number of drug batches for Alnylam. We expect revenue to continue to fluctuate due to the variability in Alnylam's demand for manufacturing.

Net loss in the second quarter of 2007 includes a loss of \$5.2 million which is the partial reversal of the 2006 gain on the purchase and settlement of exchangeable and development notes.

Net losses generally increased from the time of the business combination with Protiva on May 30, 2008 as this resulted in the expansion of our drug development pipeline and related expenses. More particularly, net loss in the second quarter of 2008 increased due to:

- Stock based compensation for research and development staff of \$1.0 million which is
  unusually high and is a result of accelerated vesting of all Tekmira stock options concurrent
  with the announcement of the business combination with Protiva; and
- The accrual of \$2.0 million for payments due to our former CEO.

Net loss in the third quarter of 2008 includes the \$3.9 million impairment of goodwill arising on the acquisition of Protiva and increased research and development expenses related to our ApoB SNALP program.

Net loss in the fourth quarter of 2008 includes \$1.2 million in restructuring costs as we reduced our workforce by 15 employees as part of the integration of the operations of Tekmira and Protiva. The fourth quarter loss includes \$1.3 million in foreign exchange gains largely due to the positive effect on our US denominated cash investments and accounts receivable from the strengthening of the US dollar as compared to the Canadian dollar. Ordinarily in our fourth quarter we incur an employee and executive cash bonus expense reflecting the level of success in meeting our business objectives. In response to the global economic downturn bonuses paid for 2008 were only a nominal amount and a fraction of recent years' bonuses with executives receiving no cash bonuses in 2008.

Our results for the first quarter of 2009 are discussed below.

#### **RESULTS OF OPERATIONS**

For the three months ended March 31, 2009, our net loss was \$2.1 million (\$0.04 per common share, basic and fully diluted) as compared to a net loss of \$0.4 million (\$0.02 per common share, basic and fully diluted) for first quarter of 2008. There are a number of factors contributing to changes in our results including the expansion of our business following the combination with Protiva on May 30, 2008.

**Revenue** / Revenue from research and development collaborations, licensing fees and milestone payments was \$2.9 million for the first quarter of 2009 as compared to \$1.9 million for the first quarter of 2008. The increase is largely a result of an expansion of our manufacturing and research collaboration with Alnylam.

Revenue is detailed in the following table:

	Three mor March 31,	nths ended March 31,	
(in millions Cdn\$)	2009	2008	
Research and development collaborations			
Alnylam	\$ 2.4	\$ 0.6	
Other RNAi collaborators	0.5		
Total research and development collaborations	2.9	0.6	
Licensing fees and milestone payments from Alnylam	-	1.3	
Total revenue	\$ 2.9	\$ 1.9	

Alnylam revenue / Up until December 31, 2008, Alnylam was making collaborative payments under agreements with both Tekmira and Protiva. Effective January 1, 2009, all collaborative research with Alnylam is to be performed under the Protiva Cross-License and manufacturing is to be performed under the Manufacturing Agreement. Under the Cross-License, Alnylam is required to make collaborative research payments at a minimum rate of US\$2.0 million per annum for the provision of our research staff until August 13, 2009. Under the Manufacturing Agreement we continue to be the exclusive manufacturer of any products required by Alnylam that utilize our technology through to the end of Phase 2 clinical trials. Under the new Manufacturing Agreement there is a contractual minimum payment for the provision of staff of \$11.2 million for the three years from 2009 to 2011. Alnylam also reimburses us for any external costs incurred.

We are eligible to receive up to US\$16.0 million in milestones for each RNAi therapeutic advanced by Alnylam or its partners that utilizes our intellectual property, and royalties on product sales. On April 3, 2009 Alnylam announced that they had initiated a Phase 1 human clinical trial for ALN-VSP, a product candidate that utilizes our SNALP technology. The initiation of the ALN-VSP Phase 1 clinical trial triggered a milestone payment which we expect to receive in May 2009.

**Other RNAi collaborators** / We have active revenue generating research agreements with a number of other RNAi collaborators including Roche, Bristol-Myers Squibb and Takeda.

Expenses / Research, development and collaborations / Research, development and collaborations expenses increased to \$3.6 million in first quarter of 2009 as compared to \$2.0 million in the first quarter of 2008. As a result of the business combination with Protiva on May 30, 2008, the level of our research and development activities has increased. Our research and development staff numbers have increased to 60 at March 31, 2009 (total staff 72) as compared to 39 (total staff 49) at March 31, 2008. We now occupy the majority of our leased facility whereas in the first quarter of 2008 we were receiving sub-lease income for two-thirds of the facility. Program expenses for ApoB SNALP and PLK1 SNALP

also contributed to the increase in research and development expenses. Also, in the first quarter of 2008 we were not performing any manufacturing work for Alnylam whereas in the first quarter of 2009 we produced a number of batches and incurred related costs that are being charged through to Alnylam.

Intellectual property legal expenses increased from \$0.1 million in the first quarter of 2008 to \$0.3 million in the first quarter of 2009 due to the expansion of our patent portfolio following the business combination with Protiva.

**General and administrative** / General and administrative expenses were \$1.0 million for first quarter of 2009 as compared to \$0.7 million for the first quarter of 2008. The increase partially relates to higher salary costs and higher facility costs, as discussed above, as the Company apportions facility costs between research, development and collaborations and general and administrative expense categories. Legal costs in the first quarter of 2009 include costs to negotiate research agreements with our collaborative partners whereas legal costs incurred in the first quarter of 2008 related mostly to the business combination with Protiva and were capitalized.

**Amortization of intangible assets** / Amortization of intangible assets expense was \$0.3 million for the first quarter of 2009 and \$nil for the first quarter of 2008. The amortization relates to \$16.3 million in medical technology acquired through the business combination with Protiva on May 30, 2008.

**Depreciation of property and equipment** / Depreciation of property and equipment was \$0.2 million for the first quarter of 2009 as compared to \$0.1 million for first quarter of 2008. Our results from May 30, 2008 onwards include Protiva's depreciation charges. Also, capital asset purchases and depreciation thereof has increased steadily in line with our growth since expanding our Alnylam collaboration early in 2007.

Other Income/Losses / Interest income / Interest income was \$0.1 million for the first quarter of 2009 and \$0.2 million for the first quarter of 2008. Average cash, cash equivalent and short-term investment balances increased significantly as a result of our business combination with Protiva and the related \$10.0 million in new financing but average interest rates were lower in the first quarter of 2009 as compared to the first quarter of 2008. In the future, interest income will continue to fluctuate in relation to cash balances and interest yields.

**Foreign exchange gains** / Foreign exchange gains were \$0.05 million for the first quarter of 2009 and \$0.21 million for the first quarter of 2008. The gains relate to the effect of a strengthening US dollar as compared to the Canadian dollar on the portion of our net current assets that are US denominated.

#### LIQUIDITY AND CAPITAL RESOURCES

Since our incorporation, we have financed our operations through the sales of shares, debt, revenues from research and development collaborations and licenses with corporate partners, interest income on funds available for investment, and government grants and tax credits.

At March 31, 2009, we had cash and cash equivalents of approximately \$30.0 million as compared to \$31.9 million at December 31, 2008.

Operating activities used cash of \$1.1 million in the first quarter of 2009 as compared to \$0.5 million in the first quarter of 2008. Excluding changes in deferred revenue and non-cash working capital, cash used in operating activities in the first quarter of 2009 was \$1.5 million and was \$0.3 million in the first quarter of 2008. The \$0.5 million increase in deferred revenue in the first quarter of 2009 largely relates to deferred FTE revenue under the Alnylam Manufacturing Agreement whereby they are prepaying for a guaranteed level of FTEs for fiscal 2009.

Net cash provided by investing activities was \$4.9 million in the first quarter of 2009 as compared to \$0.5 million of cash used in the first quarter of 2008. Short-term investments of \$5.7 million matured in the first quarter of 2009 and were re-invested into bankers' acceptances that have a shorter maturity but comparable interest rates. Capital spending of \$0.8 million in first quarter of 2009 relates largely to ongoing facility improvements. Investing activities in the first quarter of 2008 included \$0.3 million of costs related to the business combination with Protiva.

In our 2008 Annual Report we provided guidance that we had sufficient funds on hand to continue our product development until some time in the second half of 2010. As a result of signing the Roche Product Development Agreement we now believe that our current funds on hand plus expected interest income and the contractually payable further funds from our collaborations will be sufficient to continue our product development until mid-2011 (see Forward-looking statements and Risks and uncertainties).

#### **Contractual obligations**

There have not been any material changes to our contractual obligations from those disclosed in our 2008 Annual Report other than our obligation to undertake certain research and development work under certain Roche agreements that were signed in 2009.

#### **OFF-BALANCE SHEET ARRANGEMENTS**

There have not been any material changes to our off-balance sheet arrangements from those disclosed in our 2008 Annual Report.

#### RELATED PARTY TRANSACTIONS

Research, development and collaborations expenses in the first quarter of 2009 include \$29,638 of contract research costs, measured at the exchange amount and incurred in the normal course of operations with a vendor whose Chief Executive Officer is also a director of the Company (first quarter of 2008 - \$nil).

#### **OUTSTANDING SHARE DATA**

As of April 30, 2009, we had 51,625,677 common shares outstanding and we had outstanding options to purchase 4,554,801 common shares.

#### **RISKS AND UNCERTAINTIES**

Our risks and uncertainties are discussed in further detail in our Annual Information Form dated March 31, 2009 which can be found at www.sedar.com.

Within the next several years, substantial additional funds will be required to continue with the active development of our pipeline products and technologies. In particular, our funding needs may vary depending on a number of factors including:

- revenues earned from our collaborative partnerships, particularly Alnylam and Roche;
- our decisions to in-license or acquire additional products for development, in particular for our RNAi therapeutics program;
- the extent to which we continue development or can extract significant value from our technologies;
- our ability to attract and retain corporate partners, and their effectiveness in carrying out the development and ultimate commercialization of our product candidates;
- the decisions, and the timing of decisions, made by health regulatory agencies regarding our

technology and products;

- · competing technological and market developments; and
- prosecuting and enforcing our patent claims and other intellectual property rights.

We will seek to obtain funding to maintain and advance our business from a variety of sources including public or private equity or debt financing, collaborative arrangements with pharmaceutical companies and government grants. There can be no assurance that funding will be available at all or on acceptable terms to permit further development of our products especially in light of the current economic downturn. In addition, we have not established bank financing arrangements and there can be no assurance that we will be able to establish such arrangements or that bank financing can be arranged on satisfactory terms.

If adequate funding is not available, we may be required to delay, reduce or eliminate one or more of our research or development programs. We may need to obtain funds through arrangements with collaborators or others that may require us to relinquish most or all of our rights to product candidates at an earlier stage of development or on less favorable terms than we would otherwise seek if we were better funded. Insufficient financing may also mean failing to prosecute our patents or relinquishing rights to some of our technologies that we would otherwise develop or commercialize.

In addition, we are exposed to market risk related to changes in interest and foreign currency exchange rates, each of which could adversely affect the value of our assets and liabilities. We invest our cash reserves in a portfolio of liquid, high-grade investment securities with varying terms to maturity (not exceeding two years), selected with regard to the expected timing of expenditures for continuing operations and prevailing interest rates. Investments with a maturity greater than three months are classified in our Balance Sheet as held-for-trading short-term investments and are recorded at cost plus accrued interest. In response to recent liquidity problems in asset backed commercial paper we have now moved all of our cash investments into bankers' acceptances issued by major Canadian banks. The fair value of our cash investments as at March 31, 2009 is at least equal to the face value of those investments and the value reported in our Balance Sheet. Due to the relatively short-term nature of the investments that we hold, we do not believe that the results of operations or cash flows would be affected to any significant degree by a sudden change in market interest rates relative to our investment portfolio. We purchase goods and services in both Canadian and US dollars and earn a significant portion of our revenues in US dollars. We manage our US dollar currency risk by using cash received from US dollar revenues to pay US dollar expenses and by limiting holdings of US dollar cash and cash equivalent balances to working capital levels. We have not entered into any agreements or purchased any instruments to hedge possible currency risks at this time.

#### **CONTROLS AND PROCEDURES**

Our Chief Executive Officer and the Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures for the year ending December 31, 2008 and have concluded that our disclosure controls and procedures provide reasonable assurance that material information relating to the Company was made known to them and reported as required.

Our Chief Executive Officer and the Chief Financial Officer are also responsible for the design and effectiveness of internal controls over financial reporting within the Company in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian GAAP. They have evaluated our internal controls and procedures over financial reporting as of the end of the period covered by the annual filings and believe them to provide such reasonable assurance. To the date of this interim discussion, they also concluded that there were no changes that materially affected the Company's internal control over financial reporting and disclosure controls and procedures.
